Currently (February, 2020):

- 170+ employees (150+ software developers, 5 DevOps, 8 Project managers, 9 admins)

- Customers from the US, the UK, Australia, Europe, and Russia

- Over 135 projects have been delivered within the last 2 years

Why Emphasoft?

EmphaSoft

Industrial expertise: we have earned an excellent reputation as experts on the implementation of projects in specific industries, such as healthcare, fintech and safety.

Speed of implementation: no delays, no bottlenecks in decision-making chains. We respond immediately to customers' requests and are ready to begin your project within 3 days.

Startup-oriented: our dynamic and flexible workflow optimally integrates into startups' processes. More than 20 startups worldwide prefer working with us.

Why Emphasoft?

EmphaSoft

Passion for high tech: our credo is to instantly learn and apply the most advanced technologies, such as machine learning, augmented reality, and neural networks.

Responsibility: every project and every client we work for is important to us, regardless of the duration of the project or the prominence of your brand. Please, contact us to get our clients' references.

Customer focus:

- Work schedule adjusted to the time zone of our clients

- Transparency of development processes ensured by the use of Hubstaff service

- Turn-key projects implementation

- Providing our clients with services from our own DevOps team
